KTI REAL ESTATE INFORMATION NOW AVAILABLE IN DATSCHA

Date: 17th February 2015

Datscha Oy and KTI Finland have entered into a new partnership whereby KTI's independent Finnish real estate data will be distributed through Datscha's interactive web service. The co-operation is another milestone in Datscha's Finnish service and part of the company's strategy to source, match, aggregate and distribute the market's best third party real estate information.

The **co-operation** is set to combine the strengths by both companies. KTI has been recognized as a market leader for its depth and coverage of Finnish real estate information, and during the years since its launch in Finland in 2010 Datscha has become an established platform in the Finnish real estate market.

To subscribe to the KTI real estate data through Datscha the customers will need an agreement with both KTI and Datscha.

The combination of KTI data and Datscha's web tool has been eagerly anticipated in the market: "This is the best of two worlds, we have used KTI's data and Datscha's service for quite some time and it makes a lot of sense to combine them", says Mikko Antila, Portfolio Manager at Ilmarinen Mutual Pension Insurance Company.

"KTI is recognized as the market leader in its field and its independent data is widely used by many of our customers. We are excited about distributing a digital and electronic interactive version of the KTI *Rent Bible* to such customers through Datscha" says Markus Malamo, Country Manager of Datscha Finland.

"We are pleased to capitalize on Datscha's technology and to serve our customers with yet another alternative channel for accessing our data", says Hanna Kaleva, Managing Director at KTI.

The KTI data will be accessible in Datscha from February 2015.
